NEW SCENES

This 1960 edition of The Mahi attempts to picture some of the outstanding scenes and activities in a new environment. The whole year has been a time of becoming acquainted with some new students, a few new teachers, a new principal, new rooms, new halls, and new facilities.

The end sheets and the opening pages give the setting for our entire yearbook, while each divider page frames small views which indicate what is to come on the following pages.

This year's Senior Class is unique in that it is the first class to graduate from the new Madison County High School.

THE SUPERINTENDENT AND THE SCHOOL BOARD

Mr. William H. Wetsel, Superintendent of Schools in Madison County and Greene County, spent a vast amount of time in supervising the construction of the new high school building. Mr. Wetsel still visits the school often to check the many details which are involved in the operation of a larger school layout than Madison County has ever had.

Mrs. Clemmie G. White, the Clerk of the School Board, has served in this office for a number of years.

THE PRINCIPAL

Mr. David D. Jones, Principal

To you, the Seniors of 1960, I wish to extend my congratulations and commendations for the manner and the spirit by which you adjusted to a new school building, a new principal, and new regulations imposed from state and local levels.

You have demonstrated a spirit of loyalty, devotion, and co-operation which will be difficult for future classes to emulate. I hope and believe that these same qualities will stand you in good stead in all future undertakings and will insure a good measure of success.

Best wishes to you, the first class to graduate from the new Madison County High School Building.

Sincerely
David D. Jones

Mrs. Volchansky says: 'Within our school there are many opportunities for students to extend services to their fellow students, but there is probably no greater opportunity than in being a Library Assistant. The twelve students who have manned the library desk this year have done so simply because they wanted to. They have assisted the student body in checking out nearly 10,000 library books during the year while answering innumerable questions, keeping books straight, and mending and repairing worn volumes.

The Library Club, too, has joined in the spirit of things. Formerly open to Library Assistants only, the club was opened to all students this year. The members made an honest effort to learn more about books and authors. Their chief activity was the annual Open House, at which time the new books were introduced."

The Senior Class

For the first time in the history of the school, perhaps, the Senior Class had to become adjusted to being divided between two homerooms. For a number of years the Senior Class had been the only class which had remained in one homeroom. One result of this plan was an extremely overcrowded situation. This year Mrs. Finks had one group, and Miss Huckstep had the other; the total members of both sections was forty-six. This, however, is one of the school's smaller Senior Classes, for the average is usually fifty.

Through the two homeroom SCA representatives, Martha Nichol and Herman Jenkins, the Senior Class has been able to jointly keep in touch with the activities of the school.

MORE NEW SCENES

Mrs. Myers and Gertrude prepare our lunches each day.

During an assembly on atomic energy, an experiment was conducted on Sue Kidd. Sue put her hand on a generator, and the reaction caused her hair to rise.

Our two janitors, Mr. Butler and Mr. Racer, pause a moment from their work to have their picture taken.

Barbara Hoffman, assistant business manager for the Mahi, and Miss Huckstep discuss selling ads for the annual.

ADVERTISEMENTS

Mr. Coppage chaperoned the ad sellers to Orange.

Miss Pattie kept the records for the annual money.

Mr. Meadows and Miss Huckstep talk over some of the problems of composing the annual.

THERE IS A DRAMATIC QUALITY IN INDUSTRY. . . . .

An overhead crane moves a roll of steel, weighing many tons, hundreds of feet in seconds. . . . . Giant press brakes develop the tremendous force needed to bend and to shape steel. These machines have such an impact that they need special footings many feet into the ground. . . . . Partition panels automatically move along a mammoth conveyor line, two stories high. From cleaning, to chemical treating, to prime coating, to finished coating, to baking - all in one smooth, continious process.

Behind each of these operations are the new men of industry - skilled, intelligent, resourceful.

If you are a high school or trade school graduate, and if you are technically inclined, you should consider what American industry has to offer. Virginia Metal Products, Inc., Orange, Virginia.
